

What Are We Doing Here?

Clinch Valley Medical Center has been a part of Southwest Virginia for 65 years. What are we doing here? Here are just a few things:

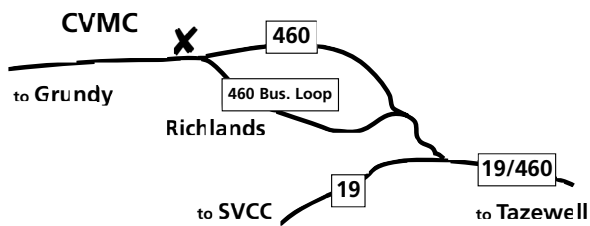

We're keeping you safe.

Our Emergency Department, open "24x7x365," assures you of round-the-clock physician and nursing coverage. You count on us for prompt, efficient treatment of everything from chest pain to trauma.

We're taking care of your heart.

Our range of Heart Services include implanting pace-makers and Cardiac Catheterization for diagnosing and treating heart disease. And our Cardiac Rehabilitation program helps you recover from heart disease, allowing you to live your life to your highest potential.

We're fighting cancer.

Through our comprehensive Cancer Services we provide the technology that gives you and your physician powerful weapons to fight cancer. From prevention and diagnosis – with PET scanning, MRI, Nuclear Medicine and other advanced tools – through surgical, medical and radiation treatment, we continue to fight for your health.

We're helping you breathe.

By providing early diagnosis and treatment of Chronic Obstructive Pulmonary Disease (COPD), and enrollment in our Pulmonary Rehabilitation Program, the professionals in our Pulmonary Department help you deal with the effects of progressive lung diseases while improving your quality of life to the highest level of your capabilities.

We're giving your family a healthy start.

Our beautiful, comfortable birthing suites help make the arrival of your little one an occasion the whole family can celebrate together. And if mom and baby need a bit of extra help, we have the staff on hand to deliver the care that is needed.

We're supporting our community.

In addition to exceptional healthcare, we provide jobs for hundreds of families. Each year Clinch Valley Medical Center pays millions of dollars in taxes, provides millions more in unreimbursed care for our less fortunate residents, and contributes tens of thousands of dollars to support community causes. Our employees contribute to their communities in countless ways, helping make this area an ideal place to live and raise a family.

We're offering you our best.

Our 500 employees deliver the high-quality, technologically advanced healthcare found in large city medical centers, yet offer it with the compassion you expect from your community hospital. Our mission at Clinch Valley Medical Center is to foster a commitment by all employees to achieve a culture of Exceptional Healthcare through Exceptional Teamwork in an Exceptional Place. We work daily to achieve this goal because you deserve the best.

What are we doing here? We're doing our best... for you.
